**AUTOIMMUNITY: EXPERIMENTAL AND
CLINICAL ASPECTS^a**

Editors

ROBERT S. SCHWARTZ and NOEL R. ROSE

CONTENTS

Introduction. <i>By</i> ROBERT S. SCHWARTZ	xi
--	----

Part I. Genetics of Autoimmunity

Hugh O. McDevitt, Chair

HLA Class II Variants: Structural Studies and Disease Associations. <i>By</i> GERALD T. NEPOM	1
Molecular Genetics and T Cells in Autoimmunity. <i>By</i> PETER STASTNY, LINDA K. MYERS, GABRIEL NUÑEZ, MARIE L. HOOVER, J. DONALD CAPRA, and EDWARD J. BALL	12
Gene Conversion: A Mechanism to Explain HLA-D Region and Disease Association. <i>By</i> C. GARRISON FATHMAN, JORG GORONZY, and CORNELIA WEYAND	24
Genetics of the Complement System. <i>By</i> CHESTER A. ALPER	32
Origins of Pathogenic Anti-DNA Idiotypes in the NZB × SWR Model of Lupus Nephritis. <i>By</i> SYAMAL K. DATTA and JERRIE GAVALCHIN	47
Auto-Epitopes and Autoimmune Diseases. <i>By</i> IAN R. MACKAY, IAN H. FRAZER, L. JANE MCNEILAGE, and SENGH WHITTINGHAM	59

Part II. Idiotypic Network

Ian Mackay, Chair

Anti-Idiotypic Immunity in Autoimmunity. <i>By</i> PIERLUIGI E. BIGAZZI	66
Idiotypes and Anti-Idiotypes in Experimental Autoimmune Myasthenia Gravis. <i>By</i> MIRIAM C. SOUROUJON and SARA FUCHS	81
T and B Cell Connections in Experimentally Induced Autoimmunity. <i>By</i> D. K. MALE, G. PRYCE, A. COOKE, P. HUTCHINGS, S. MARSHALL-CLARKE, and I. M. ROITT	94
Rheumatoid Factors: Immunochemical, Molecular, and Regulatory Properties. <i>By</i> MARC MONESTIER, BLANCHE BELLON, AUDREY J. MANHEIMER, and CONSTANTIN A. BONA	106

^aThe papers in this volume were presented at a conference entitled Autoimmunity: Experimental and Clinical Aspects, which was held by the New York Academy of Sciences on June 17-19, 1985, in New York City.

A Novel Chimeric Antibody with Circular Network Characteristics: Autobody. By CHANG-YUIL KANG and HEINZ KOHLER	114
---	-----

Part III. Properties of Autoantibodies

G. Wick, *Chair*

Monoclonal Autoantibodies That React with Multiple Organs: Basis for Reactivity. By ABNER LOUIS NOTKINS and BELLUR S. PRABHAKAR	123
Natural Autoantibodies Constitute a Substantial Part of Normal Circulating Immunoglobulins. By G. DIGHERO, P. LYMBERI, B. GUILBERT, T. TERNYNCK, and S. AVRAMEAS	135
Postinfectious Autoimmunity: Two Distinct Phases of Coxsackievirus B3-Induced Myocarditis. By NOEL R. ROSE, LUANNE J. WOLFGAM, AHVIE HERSKOWITZ, and KIRK W. BEISEL	146
Monoclonal Antibody Studies Defining the Origin and Properties of Autoantibodies in Graves' Disease. By LEONARD D. KOHN, FRANCISCO ALVAREZ, CLAUDIO MARCOCCI, ANDREA D. KOHN, DANIELA CORDA, WILLIAM E. HOFFMAN, DONATELLA TOMBACCINI, WILLIAM A. VALENTE, MICHELE DE LUCA, PILAR SANTISTEBAN, and EVELYN F. GROLLMAN	157
Speculation on the Role of Somatic Mutation in the Generation of Anti-DNA Antibodies. By ANNE DAVIDSON, ROBERTA HALPERN, and BETTY DIAMOND	174
Human Pemphigus Autoantibodies Are Pathogenic to Squamous Epithelium. By LUIS A. DIAZ, JUSTIN T. ROSCOE, N. FRED EAGLSTEIN, RAMSY S. LABIB, HARISH P. PATEL, DIYA F. MUTASIM, and GRANT J. ANHALT	181

Part IV. Origins of Autoantibodies

Deborah Doniach, *Chair*

Monoclonal Anti-DNA Antibodies: The Targets and Origins of SLE Autoantibodies. By B. DAVID STOLLAR and ROBERT S. SCHWARTZ	192
Studies of the Effects of Y Chromosome Factors on the Expression of Autoimmune Disease. By ALFRED D. STEINBERG, KATHLEEN H. TRIEM, HOWARD R. SMITH, CARL A. LASKIN, YVONNE J. ROSENBERG, DENNIS M. KLINMAN, J. FREDERIC MUSHINSKI, and JOHN D. MOUNTZ	200
The Auto-Anti-Idiotypic Route to Antireceptor Antibodies. By BERNARD F. ERLANGER, W. L. CLEVELAND, N. H. WASSERMANN, H. H. KU, B. L. HILL, K. K. WAN, R. SARANGARAJAN, and A. S. PENN	219
Immune Response Potential and Its Genetic Regulation in Autoimmune Diseases: Alterations in Systemic Lupus Erythematosus and Thyroid Autoimmune Diseases. By ZVI BENTWICH, Y. SHALEV, R. SEGAL, D. KATZ, and E. MOZES	227
The Questionable Role of Anti-DNA Antibodies in the Pathogenesis of Systemic Lupus Erythematosus. By JEAN-FRANÇOIS BACH, LAURENT JACOB, GILLES FEUTREN, and FRANÇOIS TRON	231
HLA-D/DR Expression on Epithelial Cells: The Finger on the Trigger? By I. TODD, M. LONDEI, R. PUJOL-BORRELL, R. MIRAKIAN, M. FELDMANN, and G. F. BOTTAZZO	241

Ia Antigen Expression and Autoimmunity in MRL- <i>lpr/lpr</i> Mice. By YVONNE J. ROSENBERG, PAUL K. GOLDSMITH, JUNICHI OHARA, ALFRED D. STEINBERG, and WILLIAM OHRNER	251
---	-----

Part V. New Forms of Therapy

Irun R. Cohen, *Chair*

Vaccination against Experimental Autoimmune Diseases Using T Lymphocytes Treated with Hydrostatic Pressure. By OFER LIDER, MEIR SHINITZKY, and IRUN R. COHEN	267
Therapy of Autoimmune Diseases with Antibody to Immune Response Gene Products or to T-Cell Surface Markers. By LAWRENCE STEINMAN, MATTHEW K. WALDOR, SCOTT S. ZAMVIL, MAE LIM, LEANORE HERZENBERG, LEONARD HERZENBERG, HUGH O. MCDEVITT, DENNIS MITCHELL, and SUBRAMANIAM SRIRAM	274
Treatment of Autoimmune Disease with Total Lymphoid Irradiation: Cellular and Humoral Mechanisms. By S. STROBER, B. KOTZIN, E. FIELD, R. HOPPE, B. MYERS, and A. TANAY	285
A Possible New Therapy of Systemic Lupus Erythematosus (SLE). By H. BOREL, D. BASTIAN, B. COOPER, and Y. BOREL	296
Cyclosporine as a New Approach to Therapy of Autoimmune Diseases. By J. F. BOREL and H. C. GUNN	307
Hormonal Approaches to Immunotherapy of Autoimmune Disease. By NORMAN TALAL, S. ANSAR AHMED, and MICHAEL DAUPHINEE	320

Poster Papers

Experimental Autoimmune Uveitis (EAU): An Anti-Idiotypic Antibody Study. By CARMEN F. MERRYMAN and LARRY A. DONOSO	329
BALB/c Substrain Differences in Susceptibility to Experimental Allergic Encephalomyelitis (EAE). By WILLIAM F. HICKEY, WILLIAM M. KIRBY, and CORY TEUSCHER	331
Experimental Allergic Orchitis in Mice: Linkage of Disease Susceptibility to the Locus Controlling <i>Bordetella pertussis</i> Induced Sensitivity to Histamine. By CORY TEUSCHER	334
Characterization of the Antigen of Human Antitubular Basement Membrane Antibody-Associated Interstitial Nephritis. By M. CLAYMAN, L. MICHAUD, J. BRENTJENS, G. ANDRES, and E. G. NEILSON	336
The Induction of Antigen-Specific Suppressor Cells (Ts) Diminishes Disease Expression in Mice with Interstitial Nephritis. By R. MANN and E. G. NEILSON	338
Induction of Type II Collagen Autoimmune Arthritis and Ear Disease in Monkey. By T. J. YOO, J. M. STUART, T. TAKEDA, N. SUDO, R. A. FLOYD, T. ISHIBE, G. OLSON, D. ORCHIK, J. J. SHEA, and A. H. KANG	341
A Guinea Pig Model of Autoimmune Endolymphatic Hydrops. By T. J. YOO, N. SUDO, Y. YAZAWA, R. A. FLOYD, T. ISHIBE, and T. TAKEDA	343

Increased Thromboplastin Production in Multiple Sclerosis: An Immunologic Defect? <i>By</i> CHARLES R. SPILLERT, MARINO P. HAFSTEIN, VENKATA LANKA, and ERIC J. LAZARO.....	345
Immunological Studies of the Prostate. <i>By</i> RICHARD J. ALBIN, RACHEL STEIN, JOHN M. BARTKUS, and MAURICE J. GONDER	347
Suppression of Collagen Arthritis by $Ly1^{-2+}$ Antigen-Specific T Suppressor Cells. <i>By</i> THOMAS F. KRESINA	350
Treatment of Diabetic (db/db) Mice with Anti-Class-II MHC Monoclonal Antibodies. <i>By</i> BHAGIRATH SINGH and WILLIAM J. CLIFFE	353
In Insulin-Dependent Diabetes, the Expression of an HLA-DR4-Related Susceptibility Gene Is Dominant, but Expression of a DR3-Related Gene Is Dependent on the DR4-Related Gene. <i>By</i> MICHAEL J. MACDONALD, JERRY GOTTSCHALL, JAY B. HUNTER, KAREN L. WINTER, STEVEN D. JOHNSON, JUDITH L. BLANK, ELIZABETH P. MASON, and SHARON MABY ...	356
Aberrant Expression of HLA-DR Determinants on Human Thyroid Cells Treated with Phytohemagglutinin and γ -Interferon and on Human Melanoma Cells: Demonstration with a Binding Assay Using a New Potent ^{125}I -Monoclonal Antibody against the HLA-DR β -Chain (MAb 03-D7). <i>By</i> P. DE MEYTS, S. HALLEZ, J. L. GU, M. MERCHEZ, I. ECONOMIDIS, G. G. ROUSSEAU, J. VAN SNICK, C. SPINEL, J. P. SQUIFFLET, A. M. RAVOET, M. DE BRUYERE, K. WILLARD, F. VESSIERE, C. LEMOINE, T. BOON, H. TOYODA, F. CHEN, and J. SHIVELY	359
Immunogenetics of Collagen-Induced Arthritis (CIA) in Mice: A Model of Autoimmune Disease. <i>By</i> H. S. LUTHRA, P. H. WOOLEY, A. DILLON, S. K. SINGH, W. P. LAFUSE, C. J. KRICO, A. HUSE, J. M. STUART, M. M. GRIFFITHS, and C. S. DAVID.....	361
A Prototype Anti-DNA Autoantibody Appears to Define a New V_H Gene That Is Conserved in Many Strains of Mice. <i>By</i> KATHLEEN J. BARRETT and WILLIAM TREPICCHIO, JR.....	364
Hybridoma Lupus Anticoagulants Distinguish between Bilayer and Nonbilayer Phase Lipid Systems. <i>By</i> J. RAUCH, M. TANNENBAUM, H. TANNENBAUM, H. RAMELSON, P. R. CULLIS, C. P. S. TILCOCK, M. J. HOPE, and A. S. JANOFF	366
Demonstration of Lupus Anticoagulant Antigens Using an Enzyme-Linked Immunosorbent Assay (ELISA). <i>By</i> D. WARE BRANCH, NEAL S. ROTE, and JAMES R. SCOTT	370
Thrombocytopenia in Pregnancy-Induced Hypertension: IgG and IgM on Maternal and Umbilical Cord Platelets. <i>By</i> NEAL S. ROTE, MARK HARRISON, R. JANE LAU, and JAMES R. SCOTT	373
Cross-Reactive Idiotypes in IgA-Deficient Sera. <i>By</i> C. CUNNINGHAM-RUNDLES, M. K. L. CHEUNG, and J. KOISTINEN.....	376
Divergence of the Role of Acute Phase Protein Responses in Autoimmune Strains of Mice. <i>By</i> MARY JO STARUCH and FRANCIS J. DUMONT.....	380
Alterations of the $Ly1^{-2+}$ T-Cell Population in Murine Systemic Autoimmunity. <i>By</i> FRANCIS J. DUMONT, ROBERT C. HABBERSETT, and JACQUELINE A. TREFFINGER	383

Restricted Heterogeneity and T-Cell Dependence of Human Thyroid Autoantibody IgG Subclasses. <i>By</i> T. F. DAVIES, C. M. WEBER, P. WALLACK, and M. PLATZER	386
Production of Antibodies against S _m and RNP Antigens in Rabbits. <i>By</i> M. ISHAQ and R. ALI.....	389
HLA-DR Gene Expression in Human Thyroid Tissue and Cultured Human Thyroid Cells. <i>By</i> L. A. PICCININI, B. S. SCHACHTER, S. DURGERIAN, and T. F. DAVIES	391
Functional Properties of the A3 and B1 Allotypes of Human C4 and Their Possible Relationship to Systemic Lupus Erythematosus. <i>By</i> YUN-HUA WONG, CHOONG Y. HAN, PAMELA D. HALE, VERA M. SKANES, and PAUL LEVINE	395
Interaction between Autoaggressive T Lymphocyte Lines and Their Target Tissues: Encephalitogenic T Lymphocytes Destroy Astrocytes Presenting Myelin Basic Protein. <i>By</i> DEMING SUN and HARTMUT WEKERLE.....	399
Suppression of T-Cell Mediated Autoimmune Disease with Antibodies against the Interleukin-2 Receptor: Effect of Hybridoma ART-18 on T Line Mediated Experimental Autoimmune Encephalomyelitis. <i>By</i> HARTMUT WEKERLE and TIBOR DIAMANTSTEIN	401
Anti-Myelin Basic Protein Autoreactive T Lymphocytes in Healthy Subjects and Multiple Sclerosis Patients. <i>By</i> ELISABETH TOURNIER-LASSERVE, CLAUDE JACQUE, DIDIER FRADELIZI, and MARIE-ANNE BACH	404
Studies on Collagen II Induced Arthritis in Mice and Rats. <i>By</i> LARS KLARESKOG, RIKARD HOLMDAHL, KRISTOFER RUBIN, and HANS WIGZELL	407
Autoantibody Inducing T-Cell Lines with Atypical MHC Restriction. <i>By</i> Y. NAPARSTEK, M. P. MADAIO, K. BAUR, L. BREITMAN, and R. S. SCHWARTZ	409
Is There a Role for Antibody in the Pathogenesis of Spontaneous Diabetes in the BB Rat? <i>By</i> STEPHEN J. PROWSE, DONALD BELLGRAU, and KEVIN J. LAFFERTY.....	411
Antibodies to the Acetylcholine Receptor in Myasthenia Gravis: Comparison between Human and Fetal Calf Antigen. <i>By</i> ROBIN KAUFMAN and JOEL OGER	413
Antibodies to an M _r 64,000 Human Islet Cell Protein in the Prediabetic Period of IDDM Patients. <i>By</i> S. BÆKKESKOV, J. BRUINING, S. SRIKANTA, T. MANDRUP-POULSEN, C. DE BEAUFORT, G. EISENBARTH, J. NERUP, and Å. LERNMARK	415
Modulation of a Subset of CD4 ⁺ (T4) "T Helper" Cells in Active Multiple Sclerosis (MS) and Experimental Allergic Encephalomyelitis (EAE) in Macaques. <i>By</i> L. M. ROSE, E. A. CLARK, A. GINSBERG, J. A. LEDBETTER, S. HRUBY, and E. C. ALVORD, JR.	418
IgM-Associated Polyneuropathy: An Expression of Monoclonal Autoimmunity. <i>By</i> ALBERTO M. MARMONT.....	420
Index of Contributors.....	425
